Skills

Languages: C/C++, Java, Python, JavaScript, HTML/CSS, SQL

Technologies/Frameworks: Express.js, Node.js, React.js, TailwindCSS, Bootstrap, REST APIs, EJS, Redux

Databases: MySQL, MongoDB

Developer Tools: Git/GitHub, Render, Vercel

Relevant Coursework

- Data Structures
- Algorithm Analysis
- OOPS
- Computer Networks
- Operating System
- Database Management
- Web Development
- Computer Architecture

Education

Maharaja Surajmal Institute Of Technology (GGSIPU), New Delhi
Bachelor Of Technology— Information Technology (Third year)

September 2023– Present

- CGPA:- 8.77

Experience

Research Intern

DRDO, Ministry of Defence, Govt. of India

ISSA, New Delhi

June 2025 – July 2025

- Working as an Intern at **ISSA** (Institute for Systems Studies & Analyses)
- Developed an AI-based photo enhancement and restoration tool using DL models.

Teaching Assistant

Apna College

Remote

June 2025 – Nov 2025

- Working as a Teaching Assistant in Apna College, solving doubts and explaining topics about Web Development(MERN) & DSA.

Projects

AI Photo Enhancement & Restoration Tool— Python(Flask), React.js, OpenCV, GFP-GAN, PyTorch

[Link](#) 

- An end-to-end **AI-based** web application with responsive UI for **restoring and enhancing old, low-quality group photos** using the **GFP-GAN** deep learning model.
- Automatic Face Detection from group photos & AI-based face restoration (all or selected).
- Displays image quality metrics such as **PSNR**, **SSIM**, and **LPIPS** to objectively compare restoration quality and highlight Best & Worst restored faces.
- Combines restored faces back into the original image and allows **downloading individual or all results (ZIP)**.

Simon Says Game— HTML5, CSS, JavaScript

[Link](#) 

- The **Simon Says Swipe** game is an engaging memorization game to improve focus and memory skills.
- Players must replicate an increasingly complex sequence of flashed colors. If the player selects the wrong color, the game ends, and their score is displayed on the screen, reflecting the number of correct sequences completed.

Spotify Frontend Clone— HTML5, CSS

[Link](#) 

- A Spotify frontend clone built using **HTML5** & **CSS** replicates the visual and interactive elements of the popular music streaming platform.
- Focuses on creating a **responsive** and visually appealing user interface, including features like a navigation bar, a music library section, etc.

Extracurricular

Microsoft Student Chapter (College Society)— DSA Department

November 2024– Present

- Contributed to the development of the society, enhancing its technical initiatives and community engagement.
